

Virtue Fusion

Kelway provide server / network infrastructure, software and services to meet Virtue Fusion's current demands and to scale for future growth

"Kelway provided a flexible and attractive financial solution to Virtue Fusion's infrastructure expansion. This involved software, hardware, and support services from several major leading suppliers. Our ambitious delivery timescales were met by Kelway (who expedited delivery of a new platform from the manufacturer) and logistics (involving complex delivery to several sites globally) were also managed to my expectations"

**Geoff Nutt, Operations Director,
Virtue Fusion**

The Challenge

Virtue Fusion was suffering capacity thresholds on the current systems largely due to increasing end user demands. Kelway provided new infrastructure and a financial package to enable Virtue Fusion to meet current capacity demands and to allow for future growth and scaling.

The Solution

Kelway with multi-vendor franchises and service offerings, were able to provide the Network, Servers, Content load balancing, TPS rate shaping, Oracle and Logistic services to multiple global data centres. This was all within the scope of an on-going flexible rental agreement.

The Results

Kelway were best qualified to provide this solution to Virtue Fusion due to a combination of technical expertise with major IT vendors as well as an understanding of on-line gaming and Virtue Fusion's business requirements. This enabled Kelway to structure a cost effective solution leveraging our growing strength in the IT market place and financial stability over other competitors.
